Washington, DC 20554

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

- My thoughts... screw the large businesses and what they want to do for THEMSELVES so thay they go home with an even more bigger salary. All of you guys out there are only out for yourselves, why don't you stop and think for a minute about someone other than yourselves and those people who do have to work a minimal paying job. I've been working since I was 15 years old, I'm trying to get to the top, but I'm not stepping on people to do it, so for to shame you!

Sincerely,

Jenn Cleo
